Caliper Information - Haldex

An Introduction to Haldex Calipers

Haldex calipers are all air actuated, mostly fitted to trailer applications for 19.5" & 22.5" wheels. Haldex calipers are unhandled so the same caliper is fitted to both sides of the vehicle or trailer.

Haldex caliper part numbers are 5 digits long. Early Mark II, III & IV calipers start with an 8, later Modul X calipers start with a 9.

- | | | |
|----------|---|---|
| Mark II | – | From 03/1999 – Adjuster pins are covered by a protective cap with o-ring |
| Mark III | – | From 10/2000 – Adjuster pins are covered by a protective cap without o-ring |
| Mark IV | – | From 11/2001 – Adjuster pins stand out, no protective cap fitted |

All the above are monoblock calipers (one piece)

Modul X is a two piece caliper - Adjuster pins are covered by a protective cap without o-ring.

The Haldex caliper is used on very popular applications, such as SAF, SAE, Gigant & SMB trailers.

Caliper Information - Knorr Bremse

An Introduction to Knorr Bremse Calipers

There are 3 popular brake types within the Knorr Bremse caliper range - SB, SN & SK. The SB range was a 2 piece caliper which has evolved into the SN range. The SN range is now a one piece calipers (or Monoblock). The SK is also a Monoblock caliper which is specially designed for trailer applications with 22.5" wheels.

The SN & SK calipers have been designed so that they replace the early SB calipers. These rationalised calipers have reduced 1900+ OE fitted disc calipers to 116 part numbers. These replacement calipers are not always fitted with the same components as used on the original caliper, therefore it is vitally important to identify the caliper fitted when ordering replacement parts.

17.5" Wheels = SB5 & SN5
Single Piston / used with 335mm Brake discs

19.5" Wheels = SB6 & SN6
Twin Pistons / used with 377mm Brake disc

22.5" Wheel = SB7, SN7 & SK7
Twin Pistons / used with 430mm Brake disc
Both Axial and Radial Calipers available

Caliper Information - Meritor

An Introduction to Meritor Calipers

Meritor calipers part numbers start with LRG and finish with a 3 digit ID number. With this numbering system, caliper kits can be easily identified.

The range consists of both hydraulic and air actuated calipers for vehicle wheel sizes ranging from 16" for vans up to 22.5" fitted to truck, trailer and buses. The caliper range includes both axial and radial versions and can be either 1 or 2 piece calipers. For more information on the different type of calipers, please see the following pages.

The Majorsell kits will cover over 150 calipers and our kits have been adapted to increase effective servicing and reduce costs.

The Meritor Caliper is used on very popular applications, such as:

Ford Cargo :	Hydraulic Calipers
Iveco Eurocargo :	Hydraulic Calipers
Mercedes Vario :	Hydraulic Calipers
Renault Magnum :	D3 / LISA / ELSA
Ror Trailers :	DX195 / DUCO / ELSA
Volvo FL, FH, FM :	DUCO
